

# VistaShares Target 15 TEPRTantrum Contrarian Distribution ETF

Trading Symbol: TPRY

Listed on NYSE Arca, Inc.

Summary Prospectus

February 24, 2026

[www.vistashares.com/etf](http://www.vistashares.com/etf)

Before you invest, you may want to review the VistaShares Target 15 TEPRTantrum Contrarian Distribution ETF (the “Fund”) statutory prospectus and statement of additional information, which contain more information about the Fund and its risks. The current statutory prospectus and statement of additional information dated January 17, 2026 are incorporated by reference into this Summary Prospectus. You can find the Fund’s statutory prospectus, statement of additional information, reports to shareholders, and other information about the Fund online at [www.vistashares.com/etf](http://www.vistashares.com/etf). You can also get this information at no cost by calling at (844) 875-2288 or by sending an e-mail request to [info@vistashares.com](mailto:info@vistashares.com).

## Investment Objective

The VistaShares Target 15 TEPRTantrum Contrarian Distribution ETF primarily seeks income, and secondarily, long-term capital appreciation.

## Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

### Annual Fund Operating Expenses<sup>(1)</sup> (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.95%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses <sup>(2)</sup>	0.00%
Total Annual Fund Operating Expenses	<u>0.95%</u>

<sup>(1)</sup> The Fund’s investment adviser, Tidal Investments LLC (the “Adviser”) will pay, or require a sub-adviser to pay, all expenses incurred by the Fund (except for advisory fees and sub-advisory fees, as the case may be) excluding interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the Investment Company Act of 1940 (the “1940 Act”), and litigation expenses, and other non-routine or extraordinary expenses.

<sup>(2)</sup> Estimated for the current year.

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<b>1 Year</b>	<b>3 Years</b>
\$97	\$303

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the expense example above, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

## Principal Investment Strategies

The Fund is an actively managed exchange-traded fund (“ETF”) that seeks to generate cash distributions based on a targeted annual cash distribution level of 15% (the “Annual 15% Target”), and secondarily, long-term capital appreciation. The Fund’s strategy involves two components: (1) investing, directly or indirectly, in a portfolio of equity securities based on the BITA VistaShares TEPRTantrum Select Index (the “Index Strategy”); and (2) generating options premiums through an options portfolio (the “Options Strategies”). Primarily through the Fund’s Options Strategies, the Fund seeks to achieve the Annual 15% Target.

While the Fund is actively managed, its Index Strategy generally seeks to track the composition and performance of the BITA VistaShares TEPRTantrum Select Index (the “Index”) and its Options Strategies use options strategies applied to the same portfolio of equity securities included in the Index (“Underlying Securities”). The Fund’s investment sub-adviser, VistaShares, LLC (“VistaShares”), uses investment discretion when implementing the Fund’s Options Strategies and with respect to the Fund’s Index Strategy: (i) determines whether, in its judgement, it is more favorable to the Fund for it to invest directly or synthetically in each security in the Index; (ii) reallocates the Fund’s portfolio holdings more frequently than the Index is rebalanced, when VistaShares believes doing so is in the Fund’s interest; and (iii) to the extent required for the Fund’s portfolio to comply with relevant regulatory requirements, invests in securities not currently included in the Index, but which have been publicly disclosed as holdings by Appaloosa (defined below). In addition, the Fund will maintain an allocation to cash and/or U.S. Treasuries.

The Fund’s strategies are overseen by the Adviser and VistaShares.

## Index Strategy

The Fund invests directly or indirectly in the Underlying Securities that make up the Index. The Index includes the top 20 U.S.-listed equity securities, to the extent available, as measured by their weight within the publicly disclosed investment portfolio across the various funds and accounts managed by Appaloosa Management L.P. (“Appaloosa”), an investment management firm founded by David Tepper, whose publicly disclosed equity investments have historically reflected a range of opportunistic strategies that incorporate macroeconomic analysis with fundamental research.

The Index is constructed by BITA GmbH (the “Index Provider”) using a rules-based methodology that identifies the top 20 U.S.-listed equity securities, to the extent available, as measured by their weight within Appaloosa’s portfolio, as publicly disclosed in its most recent most recent 13F filing, which generally will reflect Appaloosa’s holdings from the prior fiscal quarter. Companies that meet the criteria described above are included in the Index. The Index is generally expected to be comprised of between 10 and 20 constituents. The Index may include securities of small-, mid-, and large-capitalization companies.

The Index is reconstituted and rebalanced quarterly (reconstitution means the Index is updated with new eligible companies based on current data; rebalancing means the weights of the companies in the Index are adjusted). In addition, the Index Provider may determine to substitute an Index constituent or make an extraordinary adjustment to the Index if it determines an extraordinary event has occurred (e.g., merger and acquisition activity, delistings, trading suspensions, etc.). The determination date for regular adjustments (each a “Selection Day”) takes place at the close of business five business days before the first trading day of the rebalancing month. On each Selection Day, Index constituents are weighted based on their allocation in Appaloosa’s portfolio, as publicly disclosed in its most recent 13F filing. If Appaloosa’s portfolio exceeds 20 eligible securities, the weight of excluded holdings is proportionally redistributed among the selected constituents.

The Index is owned, calculated, administered, and disseminated by the Index Provider. The Index Provider is not affiliated with the Fund, the Adviser, or VistaShares.

If necessary to comply with regulatory requirements or to enable the Fund to meet the Annual 15% Target, the Fund may invest in securities not currently included in the Index, but which have been publicly disclosed as holdings by Appaloosa. In these cases, VistaShares will select these securities. The Fund anticipates that any investments of this nature will be limited and made only to the extent required to satisfy applicable regulatory obligations or to enable the Fund to meet the Annual 15% Target.

*Direct/Synthetic Investments:* The Fund will invest in the equity securities either directly or indirectly (synthetically) using options and swaps (as described below). The Fund will generally invest indirectly to satisfy applicable tax requirements for regulated investment companies.

The Fund may utilize listed options to achieve synthetic exposure to the Fund's portfolio securities. The Fund primarily employs short-dated (a month or less) in-the-money call options (options with strike prices below the current market price of the underlying securities, offering immediate intrinsic value). These options allow the Fund to synthetically replicate the performance of underlying securities without direct ownership. The Fund may also utilize other option strategies to achieve similar synthetic exposure, including purchasing call options and selling put options with identical strike prices. These derivatives strategies enable the Fund to respond flexibly to market conditions, liquidity constraints, or other factors that may affect the availability or pricing of swap agreements. For additional details about the Fund's use of options, please refer to the section of the Prospectus entitled "Additional Information About the Fund."

In addition to options, the Fund may enter into swap agreements with financial institutions. These swap agreements are designed to synthetically replicate the performance of the securities in the Fund's portfolio. The agreements will have specified durations, which will typically coincide with the Index's reconstitution periods, but may range from one day to more than a year. Through each swap agreement, the Fund and the financial institution will agree to exchange the return (or differentials in rates of return) based on the performance of a particular security's share price. The gross return (meaning the return before deducting any fees or expenses) to be exchanged or "swapped" between the parties is calculated with respect to a "notional amount"—a predetermined dollar value representing the underlying security that the Fund seeks to replicate synthetically.

### **Options Strategies – Seeking Premiums**

Separately, the Fund employs various options strategies focused on generating premiums. Generally speaking, the Fund sells (writes) options on certain or all of its Underlying Securities, receiving premiums from counterparties that pay for the right to buy or sell at a set price. These premiums are an important driver of the Fund's distributions. On a monthly or more frequent basis, the Adviser uses one or more options strategies to seek to generate net premiums (i.e., option premiums received, less option premiums paid) with a target of approximately 1.3% per month. **Actual results may vary and are not guaranteed.** Receipt of an option premium does not always represent income; depending on the outcome of the overall options transaction.

Premium levels are influenced by market conditions, particularly volatility, and the Adviser may adjust the Fund's options strategies depending on the outlook for a particular Underlying Security. While option selling may provide premium opportunities, it may also limit upside gains or increase downside risk.

The options strategy most frequently utilized by the Fund is called a covered call spread, which is a type of selling credit spread. The Fund uses covered call spreads to earn premium by selling a call option while buying another at a higher strike, with both profit and loss capped. See the prospectus section titled "Additional Information About the Funds" for a list of the options strategies that the Fund may utilize, together with a description of each options strategy.

### **Annual 15% Target Distribution**

As discussed above, the Fund's options strategies are designed to seek net premiums of approximately 1.3% per month. The Fund has also established a target annual cash distribution level of approximately 15% of its net asset value (the "Annual 15% Target"). This target reflects the Adviser's expectations based on the premiums the Fund seeks to generate and the annualized effect of those premiums. In practice, the Fund's options strategies are designed to seek monthly distribution levels of roughly 1.3%, which, when annualized, correspond to the Annual 15% Target. **The Annual 15% Target is not a guarantee, nor does it represent a 15% yield or a 15% total return.** Actual distributions may be higher or lower depending on market conditions and the Fund's results.

To the extent the Fund's returns fall short of the Annual 15% Target, distributions will reduce the Fund's net asset value (NAV). Although stated as an annual target, distributions are paid more frequently, and any amount the Fund pays in excess of its earnings will reduce NAV. If the Fund's NAV declines over time, the dollar amount of future distributions will also decrease. Distributions may include a significant portion classified as return of capital ("ROC"). ROC generally represents a return of a shareholder's invested capital rather than traditional income such as dividends or interest. See the prospectus section titled "Additional Information About the Funds" for more information about option premiums and ROC.

The Fund seeks to pay distributions on a monthly or more frequent basis, but there is no assurance the Fund will achieve the Annual 15% Target in any year.

### **Collateral**

In addition, the Fund will hold cash and/or short-term U.S. Treasury securities. These securities serve a dual purpose: providing collateral for the Fund's derivatives transactions and contributing to the Fund's income generation.

## Fund Attributes

The Fund is classified as “non-diversified” under the 1940 Act. The Fund’s investment strategy is expected to result in high portfolio turnover on an annual basis. The Fund’s investments will be concentrated in an industry or group of industries to approximately the same extent as the Index is so concentrated. As of January 15, 2026, the Index was concentrated in the broadline retail industry. The Fund’s U.S.-listed equity securities may include securities of foreign issuers listed in the U.S. via American Depositary Receipts (“ADRs”).

Under normal circumstances, the Fund will invest at least 80% of the value of its net assets, plus borrowings for investment purposes, in a combination of equity securities included in the Index or derivatives instruments that provide exposure to those securities. For purposes of compliance with this investment policy, derivative instruments will be valued at their notional value.

**None of the Fund, Tidal Trust III (the “Trust”), the Adviser, the Sub-Adviser or their respective affiliates makes any representation to you as to the performance of the Index or Appaloosa Management L.P.**

**NONE OF THE FUND, THE TRUST, THE ADVISER, THE SUB-ADVISED, OR THE INDEX PROVIDER ARE AFFILIATED, CONNECTED, OR ASSOCIATED WITH APPALOOSA MANAGEMENT L.P.**

**The Fund was not developed or created by, and is not sponsored, endorsed, or approved by Appaloosa Management L.P. Moreover, Appaloosa Management L.P. did not participate in the development of the Fund’s investment strategy. Appaloosa Management L.P. does not select or approve the Fund’s portfolio holdings, nor does it participate in the construction, design, or implementation of the Fund. Appaloosa Management L.P. does not provide any assurances, guarantees, or representations regarding the Fund or its performance. Nothing herein shall be construed as an offer of any security by Appaloosa Management L.P.**

**An investment in the Fund is NOT an investment in any security of Appaloosa Management L.P. All rights in trademarks are reserved by their respective owners.**

## Principal Investment Risks

The principal risks of investing in the Fund are summarized below. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s net asset value (“NAV”) per share, trading price, yield, total return, and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the section in the Fund’s Prospectus titled “Additional Information About the Funds—Principal Risks of Investing in the Funds.”

An investment in the Fund entails risk. The Fund may not achieve its investment objective and there is a risk that you could lose all of your money invested in the Fund. The Fund is not a complete investment program. It is important that investors closely review all of the risks listed below and understand them before making an investment in the Fund.

**Index / Strategy Risks.** The Index’s holdings are derived from publicly available data, which may be delayed relative to the then-current portfolio of Appaloosa. Consequently, the Fund’s holdings, which are based on the Index, may not accurately reflect Appaloosa’s most recent publicly-disclosed investment positions and may deviate substantially from its actual current portfolio. The equity securities represented in the Index are subject to a range of risks, including, but not limited to, fluctuations in market conditions, increased competition, and evolving regulatory environments, all of which could adversely affect their performance. Moreover, while the Fund seeks to incorporate aspects of Appaloosa’s investment philosophy, past performance of the companies included in the Index does not guarantee future results. There is no assurance that these companies will deliver positive performance or generate long-term capital appreciation.

In addition, the Index and Fund are unable to incorporate aspects of the investment philosophy of Appaloosa that rely on Appaloosa’s proprietary methodologies and processes for portfolio selection. The publicly available data from which the Index is derived provides only limited information about Appaloosa’s overall portfolio and is not necessarily a complete reflection of Appaloosa’s holdings and trading positions as a whole. The Index includes only the top 20 U.S.-listed equity securities held by Appaloosa, to the extent available, which may not be a comprehensive representation of Appaloosa’s complete portfolio holdings. The Index (and therefore the Fund) is based on the holdings of Appaloosa, not individual Appaloosa funds and accounts, which may have disparate strategies and may conflict with each other.

**Derivatives Risk.** Derivatives are financial instruments that derive value from the underlying reference asset or assets, such as stocks, bonds, or funds (including ETFs), interest rates or indexes. The Fund's investments in derivatives may pose risks in addition to, and greater than, those associated with directly investing in securities or other ordinary investments, including risk related to the market, imperfect correlation with underlying investments or the Fund's other portfolio holdings, higher price volatility, lack of availability, counterparty risk, liquidity, valuation and legal restrictions. The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. The use of derivatives may result in larger losses or smaller gains than directly investing in securities. When the Fund uses derivatives, there may be an imperfect correlation between the value of the Underlying Security and the derivative, which may prevent the Fund from achieving its investment objective. Because derivatives often require only a limited initial investment, the use of derivatives may expose the Fund to losses in excess of those amounts initially invested. In addition, the Fund's investments in derivatives are subject to the following risks:

*Options Contracts.* The use of options contracts involves investment strategies and risks different from those associated with ordinary portfolio securities transactions. The prices of options are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, including the anticipated volatility, which are affected by fiscal and monetary policies and by national and international political, changes in the actual or implied volatility or the reference asset, the time remaining until the expiration of the option contract and economic events. For the Fund in particular, the value of the options contracts in which it invests are substantially influenced by the value of the relevant Underlying Securities. The Fund may experience substantial downside from specific option positions and certain option positions held by the Fund may expire worthless. The options held by the Fund are exercisable at the strike price on their expiration date. As an option approaches its expiration date, its value typically increasingly move with the value of the underlying instrument. However, prior to such date, the value of an option generally does not increase or decrease at the same rate as the underlying instrument. There may at times be an imperfect correlation between the movement in the values of options contracts and the underlying instrument, and there may at times not be a liquid secondary market for certain options contracts. The value of the options held by the Fund will be determined based on market quotations or other recognized pricing methods. Additionally, as the Fund may continuously maintain indirect exposure to one or more of the Underlying Securities through the use of options contracts, as the options contracts it holds are exercised or expire it will enter into new options contracts, a practice referred to as "rolling." If the expiring options contracts do not generate proceeds enough to cover the cost of entering into new options contracts, the Fund may experience losses.

*Swap Agreements.* The use of swap transactions is a highly specialized activity, which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. Whether the Fund will be successful in using swap agreements to achieve its investment goal depends on the ability of the Adviser to structure such swap agreements in accordance with the Fund's investment objective and to identify counterparties for those swap agreements. Additionally, any financing, borrowing or other costs associated with using swap transactions may also have the effect of lowering the Fund's return.

The swap agreements in which the Fund invests are generally traded in the over-the-counter market, which generally has less transparency than exchange-traded derivatives instruments. In a standard swap transaction, two parties agree to exchange the return (or differentials in rates of return) earned or realized on particular predetermined reference assets or underlying securities or instruments. The gross return to be exchanged or swapped between the parties is calculated based on a notional amount or the return on or change in value of a particular dollar amount invested in a basket of securities.

If an underlying security has a dramatic move that causes a material decline in the Fund's net assets, the terms of a swap agreement between the Fund and its counterparty may permit the counterparty to immediately close out the swap transaction with the Fund. In that event, the Fund could be forced to invest directly in the underlying security at a potentially unfavorable time.

**Counterparty Risk.** The Fund is subject to counterparty risk by virtue of its investments in options contracts. Transactions in some types of derivatives, including options, are required to be centrally cleared (“cleared derivatives”). In a transaction involving cleared derivatives, the Fund’s counterparty is a clearing house rather than a bank or broker. Since the Fund is not a member of clearing houses and only members of a clearing house (“clearing members”) can participate directly in the clearing house, the Fund will hold cleared derivatives through accounts at clearing members. In cleared derivatives positions, the Fund will make payments (including margin payments) to and receive payments from a clearing house through their accounts at clearing members. Customer funds held at a clearing organization in connection with any options contracts are held in a commingled omnibus account and are not identified to the name of the clearing member’s individual customers. As a result, assets deposited by the Fund with any clearing member as margin for options may, in certain circumstances, be used to satisfy losses of other clients of the Fund’s clearing member. In addition, although clearing members guarantee performance of their clients’ obligations to the clearing house, there is a risk that the assets of the Fund might not be fully protected in the event of the clearing member’s bankruptcy, as the Fund would be limited to recovering only a pro rata share of all available funds segregated on behalf of the clearing member’s customers for the relevant account class. The Fund is also subject to the risk that a limited number of clearing members are willing to transact on the Fund’s behalf, which heightens the risks associated with a clearing member’s default. If a clearing member defaults the Fund could lose some or all of the benefits of a transaction entered into by the Fund with the clearing member. If the Fund cannot find a clearing member to transact with on the Fund’s behalf, the Fund may be unable to effectively implement its investment strategy.

**Concentration Risk.** The Fund’s investments will be concentrated in an industry or group of industries to approximately the same extent as the Index is so concentrated. In such event, the value of Shares may rise and fall more than the value of shares that invest in securities of companies in a broader range of industries.

- **Broadline Retail Industry Risk.** Securities of companies in the broadline retail industry can be significantly affected by the performance of the domestic and international economy, consumer confidence and spending, intense competition, changes in demographics, and changing consumer tastes and preferences. In addition, the broadline retail industry is highly competitive and a company’s success can be tied to its ability to anticipate changing consumer tastes.

**Distribution Risk.** As part of the Fund’s investment objective to provide current income, the Fund seeks to provide cash distributions on a monthly or more frequent basis. There is no assurance that the Fund will make a distribution in any given month. If the Fund does make distributions, the amounts of such distributions will likely vary greatly from one distribution to the next.

**NAV Decline Risk Due to Distributions.** When the Fund makes a distribution, the Fund’s NAV will typically drop by the amount of the distribution on the related ex-dividend date. The repeated payment of distributions by the Fund, if any, may result in a decline in the Fund’s NAV and trading price over time. As a result, an investor may suffer losses to their investment.

**Equity Market Risk.** Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from specific issuers. The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. Common stocks, such as those held by the Fund, are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.

#### **ETF Risks.**

*Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as “Authorized Participants” or “APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

*Cash Redemption Risk.* The Fund’s investment strategy may require it to redeem Shares for cash or to otherwise include cash as part of its redemption proceeds. For example, the Fund may not be able to redeem in-kind certain securities held by the Fund (e.g., derivative instruments). In such a case, the Fund may be required to sell or unwind portfolio investments to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used. By paying out higher annual capital gain distributions, investors may be subjected to increased capital gains taxes. Additionally, there may be brokerage costs or taxable gains or losses that may be imposed on the Fund in connection with a cash redemption that may not have occurred if the Fund had made a redemption in-kind. These costs could decrease the value of the Fund to the extent they are not offset by a transaction fee payable by an AP.

*Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.

*Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.

*Trading.* Although Shares are listed on a national securities exchange, such as NYSE Arca, Inc. (the "Exchange"), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that an active trading market for the Shares will develop or be maintained or that the Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares. Shares trade on the Exchange at market price that may be below, at or above the Fund's NAV. Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange "circuit breaker" rules. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. As a result, the Fund could be adversely affected and be unable to implement its investment strategies in the event of an unscheduled closing.

**Focused Portfolio Risk.** The Fund will hold a relatively focused portfolio that may contain exposure to the securities of fewer issuers than the portfolios of other ETFs. Holding a relatively concentrated portfolio may increase the risk that the value of the Fund could go down because of the poor performance of one or a few investments.

**Economic and Market Risk.** Economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in the general financial markets, a particular financial market, or other asset classes, due to a number of factors, including inflation (or expectations for inflation), deflation (or expectations for deflation), interest rates, global demand for particular products or resources, market instability, financial system instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics. The imposition by the U.S. of tariffs on goods imported from foreign countries and reciprocal tariffs levied on U.S. goods by those countries also may lead to volatility and instability in domestic and foreign markets.

**Foreign Securities Risk.** Investments in securities or other instruments of non-U.S. issuers involve certain risks not involved in domestic investments and may experience more rapid and extreme changes in value than investments in securities of U.S. companies. Financial markets in foreign countries often are not as developed, efficient, or liquid as financial markets in the United States, and therefore, the prices of non-U.S. securities and instruments can be more volatile. In addition, the Fund will be subject to risks associated with adverse political and economic developments in foreign countries, which may include the imposition of economic sanctions. Generally, there is less readily available and reliable information about non-U.S. issuers due to less rigorous disclosure or accounting standards and regulatory practices. Investments in foreign companies' securities, including investments via depositary receipts, are subject to special risks, including the following:

- *Depositary Receipt Risk.* Depositary receipts involve risks similar to those associated with investments in foreign securities and give rise to certain additional risks. Depositary receipts listed on U.S. or foreign exchanges are issued by banks or trust companies, and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares (Underlying Shares). When the Fund invests in depositary receipts as a substitute for an investment directly in the Underlying Shares, the Fund is exposed to the risk that the depositary receipts may not provide a return that corresponds precisely with that of the Underlying Shares.

**High Portfolio Turnover Risk.** The Fund may actively and frequently trade all or a significant portion of the Fund's holdings. A high portfolio turnover rate increases transaction costs, which may increase the Fund's expenses. Frequent trading may also cause adverse tax consequences for investors in the Fund due to an increase in short-term capital gains.

**Inflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the present value of the Fund's assets and distributions, if any, may decline.

**Management Risk.** The Fund is subject to management risk because it is an actively managed portfolio. The Fund's sub-adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that the Fund will meet its investment objective.

**Market Capitalization Risk.**

- *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
- *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large-capitalization stocks or the stock market as a whole.
- *Small-Capitalization Investing.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large- or mid-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large- or mid-capitalization stocks or the stock market as a whole. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies.

**New Fund Risk.** The Fund is a recently organized management investment company with no operating history. As a result, prospective investors do not have a track record or history on which to base their investment decisions.

**Newer Sub-Adviser Risk.** VistaShares is a recently formed entity and has limited experience with managing an exchange-traded fund, which may limit the Sub-Adviser's effectiveness.

**Non-Diversification Risk.** Because the Fund is "non-diversified," it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund. As a result, a decline in the value of an investment in a single issuer or a smaller number of issuers could cause the Fund's overall value to decline to a greater degree than if the Fund held a more diversified portfolio.

**Operational Risk.** The Fund is subject to risks arising from various operational factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund relies on third-parties for a range of services, including custody. Any delay or failure relating to engaging or maintaining such service providers may affect the Fund's ability to meet its investment objective. Although the Fund, Adviser, and Sub-Adviser seek to reduce these operational risks through controls and procedures, there is no way to completely protect against such risks.

**Tax Risk.** The Fund intends to elect and to qualify each year to be treated as a RIC under Subchapter M of the Code. As a RIC, the Fund will not be subject to U.S. federal income tax on the portion of its net investment income and net capital gain that it distributes to Shareholders, provided that it satisfies certain requirements of the Code. If the Fund does not qualify as a RIC for any taxable year and certain relief provisions are not available, the Fund's taxable income will be subject to tax at the Fund level and to a further tax at the shareholder level when such income is distributed.

**U.S. Government and U.S. Agency Obligations Risk.** The Fund may invest in securities issued by the U.S. government or its agencies or instrumentalities. U.S. Government obligations include securities issued or guaranteed as to principal and interest by the U.S. Government, its agencies or instrumentalities, such as the U.S. Treasury. Payment of principal and interest on U.S. Government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. In the latter case, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the U.S. Government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) where it is not obligated to do so.

## **Performance**

Performance information for the Fund is not included because the Fund has not completed a full calendar year of operations as of the date of this Prospectus. When such information is included, this section will provide some indication of the risks of investing in the Fund by showing changes in the Fund's performance history from year to year and showing how the Fund's average annual total returns compare with those of the Index and a broad measure of market performance. Although past performance of the Fund is no guarantee of how it will perform in the future, historical performance may give you some indication of the risks of investing in the Fund. Updated performance information will be available on the Fund's website at [www.vistashares.com/etf](http://www.vistashares.com/etf).

## **Management**

*Investment Adviser:* Tidal Investments LLC (the "Adviser") serves as investment adviser to the Fund.

*Investment Sub-Adviser:* VistaShares Advisors LLC (the "Sub-Adviser") serves as the investment sub-adviser to the Fund.

*Portfolio Managers:*

The following individuals are jointly and primarily responsible for the day-to-day management of the Fund.

*Investment Adviser*

Quinn Berry, Portfolio Manager for the Adviser, has been a portfolio manager of the Fund since its inception in 2026.

Scott Snyder, Portfolio Manager for the Adviser, has been a portfolio manager of the Fund since its inception in 2026.

*VistaShares*

Adam Patti, Chief Executive Officer of the Sub-Adviser, has been a portfolio manager of the Fund since its inception in 2026.

## **Purchase and Sale of Shares**

The Fund issues and redeems Shares at NAV only in large blocks known as "Creation Units," which only Authorized Participants (APs) (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the "Deposit Securities") and/or a designated amount of U.S. cash. Purchases and redemptions of Creation Units primarily with cash, rather than through in-kind delivery of portfolio securities, may cause the Funds to incur certain costs. These costs could include brokerage costs or taxable gains or losses that it might not have incurred if it had made redemption in-kind. These costs could be imposed on a Fund, and thus decrease the Fund's NAV, to the extent that the costs are not offset by a transaction fee payable by an AP.

Shares are listed on a national securities exchange, such as the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the "bid" price) and the lowest price a seller is willing to accept for Shares (the "ask" price) when buying or selling Shares in the secondary market. This difference in bid and ask prices is often referred to as the "bid-ask spread."

When available, information regarding the Fund's NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund's website at [www.vistashares.com/etf](http://www.vistashares.com/etf).

## **Tax Information**

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless an investment is in an individual retirement account ("IRA") or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

## **Financial Intermediary Compensation**

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training, or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.
